

ERRATA – GEAS

- 2 A plan developed to carry out a course of action that is not likely to be repeated in the future is called:

Correct answer: single-use plan

After leaving a company and setting up your own engineering practice, a former competitor contacts you to solve a problem similar to one you solved while working at the company. Your previous design seems to be a solution to this former competitor's problem. Can you accept this assignment?

Correct answer: No. One should not accept money twice for the same job.
