

Answers:

- | | |
|--|------------------------------------|
| 1. A. Manchester format | 23. B. Step size is too large |
| 2. A. Average information per message | 24. A. It requires large bandwidth |
| 3. A. Diverge upward when a bit is 0 and diverge downward when the bit is 1 | 25. C. quantization |
| END | |
| 4. A. Reducing the repeated string of characters | |
| 5. A. arbitrarily small | |
| 6. A. Continuous in nature | |
| 7. C. Adaptive delta modulation | |
| 8. A. 1 | |
| 9. D. Both the step size remains same and the quantizer has linear characteristics are correct | |
| 10. D. Both negative voltage and pulse is transmitted for half the duration are correct | |
| 11. D. All of the choices | |
| 12. B. 2 | |
| 13. D. All of the choices | |
| 14. B. Differential code | |
| 15. A. Nyquist criterion | |
| 16. A. EX-OR logic | |
| 17. A. Continuous phase frequency shift keying | |
| 18. A. Complete pulse duration | |
| 19. D. All of the choices | |
| 20. C. 1.544 | |
| 21. C. $C = B(1+S/N)$ bits/s | |
| 22. A. Sampling, quantizing, encoding | |
