

Multiple Choice:

1. What is the ...

Ans. **A. To convert source code into machine code**

2. What is the role of an...

Ans. **C. To provide tools for software development**

3. What is a variable in...

Ans. **D. A named storage location that holds data**

4. What is the purpose of a ...

Ans. **C. To control the flow of execution based on a condition**

5. What does the term "algorithm"...

Ans. **B. A set of rules or steps to solve a problem**

6. What is the purpose of the...

Ans. **C. To repeat a block of code until a condition is no longer true**

7. What is a function in...

Ans. **C. A block of reusable code that performs a specific task**

8. What is the ...

Ans. **C. To organize and store multiple values of the same data type**

9. What is the term used to...

Ans. **D. Correct program**

10. What does the term "...

Ans. **B. The lifetime and accessibility of a variable**

11. Which type of error occurs...

Ans. **B. Runtime error**

12. Which term refers to a named...

Ans. **B. Function**

13. What is the purpose of ...

Ans. **C. To control the flow of program execution based on conditions**

14. In computer programming...

Ans. **B. The study of algorithm efficiency as input sizes grow**

15. What is the main focus ...

Ans. **C. To understand how consumers make purchasing decisions**

16. What is the primary goal...

Ans. **C. Enhancing code readability and maintainability**

17. What does the SOLID...

Ans. **B. Liskov Substitution**

18. Which of the following is ...

Ans. **C. Using descriptive and meaningful names**

19. What is the purpose of...

Ans. **C. To ensure that individual units of code work as expected**

20. What is the purpose ...

Ans. **D. To improve the structure and design of the code**

21. Which software development...

Ans. **B. Agile**

22. Which formal model ...

Ans. **A. Turing machine**

23. Which programming ...

Ans. **C. Procedural programming**

24. What is the role of comments...

Ans. **B. To provide additional information and context about the code**

25. What is exception ...

Ans. **A. A technique to handle unexpected errors during program execution.**

26. What is the purpose of a...

Ans. **C. To manage the positioning and sizing of GUI components within a container.**

27. What is an event-driven ...

Ans. **C. A programming style that relies on user actions or system events to trigger program behavior.**

28. Which of the following is...

Ans. **D. Classes**

29. Which programming paradigm...

Ans. **C. Object-oriented programming**

30. Which of the following...

Ans. **D. Array**

31. What is the purpose of ...

Ans. **C. To control program flow based on certain conditions.**

32. What is the primary...

Ans. **B. Simplicity and clarity of code**

33. Which control structure is...

Ans. **C. For loop**

34. What is the purpose of ...

Ans. **C. To promote code reusability**

35. Which concept in...

Ans. **D. Decomposition**

36. Which programming construct...

Ans..**A. If-else statement**

37. Which programming principle...

Ans. **D. Control flow**

38. Which programming ...

Ans. **D. Exception handling**

39. Which of the following...

Ans. **C. Use of subroutines**

40. Which of the following...

Ans. **A. Recursion**

41. Write a pseudocode to...

Ans. **B. sum = 100 * (100 + 1) / 2**

42. Write a pseudocode to ...

Ans. **B. max = a if a > b else b if b > c
else c**

43. Write a pseudocode to ...

Ans. **A. if num % 2 == 0: print "Even"
else: print "Odd"**

44. Write a pseudocode to...

Ans. **A. factorial = 1
for i = 1 to n:
factorial = factorial * i
endfor**

45. Write a pseudocode to...

Ans. **B. sum = 0
i = 2 to n * 2 step 2:
sum = sum + i
endfor**

46. Write a pseudocode to check...

Ans. **C. is_prime = true
for i = 2 to sqrt(num):
if num % i == 0:
is_prime = false
exit loop
endif
endfor**

47. Write a pseudocode to ...

Ans. **A. fibonacci[0] = 0
fibonacci[1] = 1
for i = 2 to n:
fibonacci[i] = fibonacci[i-1] +
fibonacci[i-2]
endfor**

48. Write a pseudocode to...

Ans. **B. sum = 0
for i = 2 to 100 step 2:
sum = sum + i
endfor**

49. Write a pseudocode to ...

Ans. **D. vowels = 0
for i = 0 to length(string):
if string[i] in ["a", "e", "i",
"o", "u"]:
vowels = vowels + 1
endif
endfor**

50. Which of the following...

Ans. **D. Pseudocode is a way to
represent algorithms in a human-
readable form.**
